

$$T = \frac{m_A}{m_B} \times 100$$

$$6 = \frac{42,55}{m_B} \times 100$$

$$\frac{6}{1} = \frac{4255}{m_B}$$

Effectuons un produit en croix.

$$6 \times m_B = 1 \times 4255$$

$$m_B = \frac{4255}{6}$$

$$m_B = 709,17$$

Le budget global de la France est d'environ 709 milliards d'euros.
